

#6 BARREL LOCK & KEY SYSTEM

The #6 Barrel Lock and Key System provides a smooth plunger design and heavy spring for pick resistance. In addition to the optional stainless steel construction, this universal barrel lock and key system also meets the interchangeability requirements with other manufacturers' lock and keys.

Note: The #6 key can be used to open a #4 lock.

Highfield #6 Series Universal Barrel Lock & Key System Overview

Designed for all four utilities but most commonly used by electric utilities, the #6 Lock System is a smart and reliable investment. The #6 lock and key meets the interchangeability requirements with the three other barrel lock manufacturers.

#6 Universal Barrel Lock & Key System is interchangeable with:

- Inner-Tite's Anker Series
- DeWalch's standard or D Series
- Brooks "F" Series

Benefits of the #6 Barrel Lock & Key System

- Smooth plunger design & heavy spring for pick resistance
- Barrel designed for strength & durability
- Plated & case hardened components for long life & corrosion protection
- Meets interchangeability requirements with other manufacturers' lock & keys
- Stainless steel construction
- Compatible [barrel lock end caps](#) in a variety of styles available

How to Engage & Release the #6 Lock Series

To engage the lock, you simply push the key into the barrel lock and then push the lever down to retract the balls and push the lock all the way in. Once it is inserted all the way into the ring or guard, you can pull the lever back up and remove the key. The #6 key also opens the #4 lock.

Engaging the #6 Barrel Lock & Key System:

1. Push the key into the barrel lock
2. Push the lever down to retract the balls
3. Push the lock all the way in

Releasing the #6 Barrel Lock & Key System:

1. Lock must be inserted all the way into the ring or guard
2. Pull lever back up
3. Remove the key

Simplify Secure Barrel Lock Installation & Removal with EZY Key

The Highfield #6 EZY Barrel Lock Key makes barrel lock installation and removal simple and straightforward. The ergonomic grip has been designed with utility revenue protection investigators in mind. It is easy to operate, fits in your right or left hand comfortably and is manufactured of durable materials for long lasting use. The key handle can be serialized for identifying purposes and optimum key control.

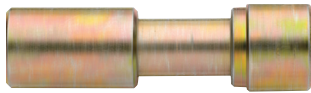

Advantages of EZY Key:

- Eliminates breakage
- Ergonomic design for ease of use
- Minimizes hand stress
- Grip permits easy installation & removal of barrel locks
- Manufactured with durable materials

Universal Barrel Locks & Keys for Utility Security

Designed specifically for utilities, the reliable performance of the #6 Locking System makes it a smart security investment. There are numerous lock styles and two key styles to choose from. Highfield also manufactures a [one-piece utility padlock preloaded with our #6 barrel lock](#) mechanism.
