

# GAS GATHERING

## HIGH DENSITY BIMODEL POLYETHYLENE PIPE

High Density Polyethylene (HDPE) pipe has been a leading material choice for the Gas Gathering industry.

The reasons for using HDPE are vast and a few of those reasons are noted below. For further information please refer to CSA Z662.

### ABOUT OUR PRODUCTS

- Polytubes manufactures the full spectrum of HDPE PE2708, , PE4710, and PE100 pipe for the gas distribution market
- Polyethylene pipe can be plowed (planted) at temperatures as low as -20°C
- 50% savings compared to other products and is available up to 6" on reels.
- Excellent chemical resistant
- Certified PE-4710 HDPE resins are used
- Resistance to electrolytic corrosion
- Higher flow rates versus steel
- Pipe can be butt fused at site
- Leak free joints
- Available in sticks, coils and reels

***Should this also have Bimodel and Sustainable Solutions***
