

IRRIGATION

WILL NOT RUST, CORRODE OR LOSE WALL THICKNESS

Irrigation has become extremely important for all growers, so Polytubes has made it important to us.

We manufacture a large variety of irrigation pipe for all sorts of applications. For information on irrigation pipe resins, diameters, lengths, coil, or reels please call one of our representatives.

Irrigation pipes are widely used in large and small projects such as outdoor water supply in agriculture areas, farmland irrigation, brine pipelines in the salt and chemical industry, water delivery in aquaculture, drainage and hard hose irrigation systems.

- MDPE (PE2708) & HDPE (PE4710)
- Irrigation Pipe Higher tensile properties needed for these stressful environments
- Irrigation pipe will not rust, corrode, or lose wall thickness.
- It is also resistant to internal abrasion, stress cracking and a variety of chemicals.
