

## Round Locate Marker – Dual-Function Line Locator and Marker

Vulcan's Round Locate Marker serves as both a fully functional line locator and a durable line marker, providing dual functionality in one reliable product. Based on the design of our robust Bullet Marker, this versatile tool includes an industry-standard Terminal Station at the top, enabling convenient access for monitoring and identification.

### Accessible Terminal Station for Monitoring Leads

The Terminal Station on the Round Locate Marker is engineered for quick and easy access to the leads needed to locate buried cables and infrastructure. Built with high-impact polycarbonate for superior durability, the Terminal Station is designed to withstand outdoor conditions while offering consistent performance in utility environments.

### Key features of the Terminal Station include:

- **High-Impact Polycarbonate Construction** – For long-lasting strength and resilience.
- **5 Stainless Steel Binding Posts** – Pre-assembled to the terminal board for reliable connectivity.
- **Optional Bonding Straps** – Available for added versatility in grounding applications.
- **Grounding Capabilities** – Can function as a grounding box for increased safety.
- **Optional Isolation Switch** - Available for better locate performance

## Durable, Environmentally Friendly Marker Posts

The Round Locate Marker's post and printed sleeve are made from specially formulated HDPE, featuring UV inhibitors and color pigments for enhanced visibility and longevity. The HDPE components are fully recyclable, providing an environmentally responsible choice without compromising durability. Each marker post is designed to retain color vibrancy and withstand the elements, ensuring effective marking for years to come.

With Vulcan's Round Locate Marker, you gain a reliable, high-quality solution for both line locating and marking, engineered to meet the unique demands of telecommunications and utility projects.
