

## **Pavement Markers – Durable, High-Visibility Messaging for Roadways**

Vulcan's pavement markers offer a superior solution for conveying messages on roadways, providing clarity and durability beyond traditional marking paint.

Our pavement markers are made from high-quality, aluminum foil-based material, similar to that used in highway construction zones for temporary lane changes. Designed to conform seamlessly to asphalt or concrete surfaces, these markers adhere firmly, thanks to a highly aggressive adhesive that ensures a long-lasting hold even on uneven pavement.

You can customize Vulcan's pavement markers with your own messaging, making them ideal for a variety of applications, from traffic control to utility markings and safety notices. Whether you need standard regulatory text, company branding, or unique identifiers, our high-visibility markers can be tailored to meet your specific needs. With durable, fade-resistant printing, your message remains clear and legible, even in high-traffic areas.

The marker on the left is ~1-year-old and the right marker is brand new.
