

## PLASTIC PIPE BEVELER

---

### 9015 HAND OPERATED PLASTIC PIPE BEVELER

The Universal Plastic Pipe Beveler makes a 15° bevel on SDR35 and Sch 40 thermoplastic pipe through 12" (300mm) capacity. It is lightweight and easy to adjust to different wall thicknesses for beveling and deburring. **Wide saddle won't twist and dig into the pipe like others.**

### POWER OPERATED PLASTIC PIPE BEVELER

The power bevelers are designed for a wide variety of situations including high production applications. Our advanced HSS cutter design makes a smooth 15° bevel, which is adjustable for length and depth. Tools are easy to use and drastically reduces beveling time, especially on large pipe sizes or when doing production beveling.

### SPECIFICATIONS

- Capacity: 1 1/2" through 12" (38–300mm) Diameter
- Shipping weight - 5 lbs. (2.3kg)
- 9000 Capacity: 4" (100mm) and up. 115V, 1 3/4 hp., 11.0-amp motor, 24,500 RPM - 15 lbs. (6.8kg)
- 9001 Model 9000 with Carbide Bit - 15 lbs. (6.8kg)
- 9050 Pneumatic Beveler 1 1/2 hp., 20,000 RPM - 13.5 lbs. (6kg)
