

High-Quality U Channel Sign Posts for Any Application

Vulcan's U Channel Sign Posts are trusted across the industry for their strength, durability, and versatile applications. Made from high-carbon, hot-rolled steel, each post features 3/8" diameter holes on 1" centers, providing a consistent mounting solution for various signage needs. Our U Channel Posts offer reliability and strength, whether for temporary or permanent signage.

Available Finishes for Every Environment

To ensure longevity and resilience in all environments, Vulcan's U Channel Posts come in three durable finishes:

- **Green Painted** – Ideal for an environmentally blended look.
- **Hot Dip Galvanized** – Provides superior corrosion resistance.
- **Powder Coated** – For additional color options and extra durability.

With these finish options, Vulcan's U Channel Posts are prepared for diverse outdoor applications, standing up to harsh weather conditions and wear.

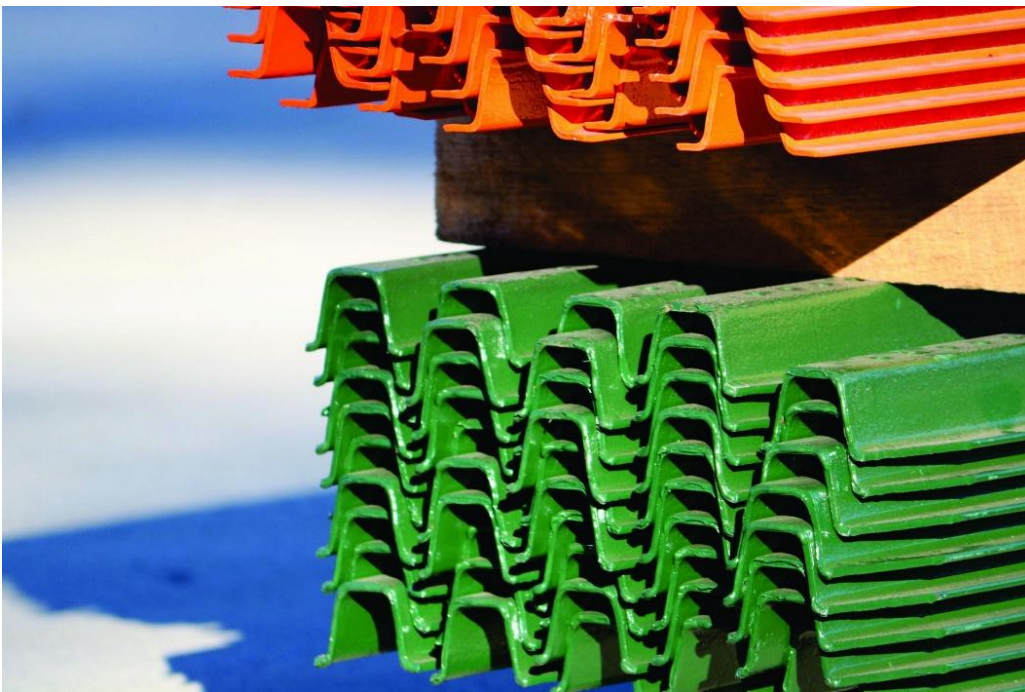

Versatile Sizes for Multiple Sign Types

Vulcan's U Channel Posts are available in different weights to match specific sign requirements. For smaller signs, the 1.12 lb/ft post offers an ideal, lightweight solution. For

larger or more permanent signs between 2 and 9 square feet, the 2 lb/ft and 3 lb/ft posts provide the necessary stability and strength for long-lasting installations.

This is the 1.12lb/ft.

This is the 2lb/ft.
